Harmonised Vessel Particulars Questionnaire v5

GEORGIA M
IMO/LR Number 9321196
OCIMF Id: A-100-003-940

13 December 2020

DISCLAIMER
OCIMF DOES NOT WARRANT OPERATOR IDENTITY AND IS NOT RESPONSIBLE FOR THE CHOICE OF SHIPS INSPECTED, THE INSPECTORS CHOSEN, THE PERFORMANCE OF THE INSPECTIONS OR THE CONTENT OF THE REPORTS, OPERATOR COMMENTS AND/OR VESSEL PARTICULAR QUESTIONNAIRE RESPONSES DISTRIBUTED UNDER THE REVISED PROGRAMME. OCIMF IS INVOLVED ONLY IN THE RECEIPT, ORGANISATION AND DISTRIBUTION OF THE FOREGOING PROGRAMME OUTPUT. OCIMF DOES NOT REVIEW OR EVALUATE SUCH OUTPUT AND EXPRESS NO OPINION CONCERNING ITS ACCURACY. WHILE OCIMF MAKES EVERY EFFORT TO ENSURE THAT PROGRAMME OUTPUTS ARE RECEIVED, ORGANISED AND DISTRIBUTED IN ACCORDANCE WITH THE SIRE COMPOSITE GUIDELINES, OCIMF ACCEPTS NO LIABILITY FOR FAILURE TO DO SO.
1 General Information

1.1 Date this HVPQ document completed 13 December 2020

1.1.2 Vessel identification

1 Name of ship GEORGIA M
2 LR/IMO number 9321196
3 Company IMO number 5519347

1.1.3 Previous names

<table>
<thead>

1.1.4 Flag

1 Flag PANAMA
2 Has the flag been changed? No
3 What was the previous flag? 

1.1.5 Port of Registry Panama

1.1.6 Call sign 3EKQ9

1.1.7 Ship contacts

1 INMARSAT number +870773910105 / +302112340534
2 Ship’s fax number N/A
3 Ship’s telex number Sat C: 437279610
4 Mobile phone number N/A
5 Ship’s email address GeorgiaM.Master@benetechfleet.com

1.1.8 What is the type of ship as described in Form A or Form B Q1.11 of the IOPPC? Oil Tanker

1.1.9 What is the Ship’s Maritime Mobile Selective Call Identity (MMSI) number? 372796000

1.1.10 Type of Hull Double hull

1.1.11 Name of P and I Club THE LONDON STEAM-SHIP OWNERS’ MUTUAL INSURANCE ASSOCIATION LIMITED

1.1.12 EEDI rating number NA

2 Ownership and Operation

2.1 Registered owner

1 Name GEORGIA NAVIGATION SA
2 Full address 80 BROAD STREET MONROVIA LIBERIA, C/O 4S, EVELPIDON AVENUE, VOULA 16673 GREECE
3 Country LIBERIA

**1.2.2 Number of years this ship has been owned by Registered Owner**

3.10 Years

**1.2.3 Technical operator (if different from registered owner)**

1. Name
   - BENETECH SHIPPING SA
2. Full address
   - 45 Evelpidon Avenue, Voula 16673, Greece
3. Country
   - Greece
4. Office telephone number
   - +302108953880
5. Office telex number
   - Not Applicable
6. Office fax number
   - +302118000773
7. Office email address
   - mail@benetechsa.com
8. Name of Designated Person Ashore (DPA)
   - Cpt. Kostas Voulgaris
9. After-hours telephone number of DPA
   - +30 6989470580
10. Emergency callout number
    - +30 2108950532 / +30 6989470580 / +30 6955267724
11. Emergency callout pager number
    - N/A

**1.2.4 Date current operator assumed technical control of the ship**

14 June 2017

**1.2.5 Total number of ships operated by this Technical Operator**

13

**1.2.6 Commercial operator (if different from registered owner)**

1. Name
   - Geva Tankers Inc.
2. Full Address
   - 45 Evelpidon Avenue, 16673 Voula
3. Country
   - Greece
4. Office telephone number

   - 9. Contact person after hours telephone

### 3 Builder

**1.3.1 Builder name**

MINAMINIPPON SHIPBUILDING CO. LTD

**1.3.2 Date of building contract**

23 February 2004

**1.3.3 Hull number**

M695

**1.3.4 Date on which keel was laid or ship was at a similar stage of construction**

15 December 2004

**1.3.5 Date launched**

04 December 2006

**1.3.6 Delivery date as recorded in Form A or Form B Q1.8.3 of the IOPPC**

05 June 2007

**1.3.7 Major hull change**

### General Information
1. Has a major hull change been undertaken? No

2. What was the date of completion of the conversion as recorded in Form A or Form B Q1.9.3 of the IOPPC? Not Applicable

3. List what changes were made

4. Classification

1.4.1 Classification Society Bureau Veritas

1.4.2 Class notation Hull, Mach, Oil tanker ESP, Unrestricted navigation, VeriSTAR-HULL, AUT-UMS, MON-SHAFT, INWATERSURVEY, ERS-S

1.4.3 Change of classification Society

1. Has Classification Society changed? Yes

2. What was the previous Classification Society? Nippon Kaiji Kyokai

3. Date of change 25 April 2018

1.4.4 Dry dock

1. Date of last dry dock 30 October 2018

2. Date of second last dry dock 21 May 2015

3. Date next dry dock due 30 October 2021

1.4.5 Special survey

1. Date of last special survey 14 March 2019

2. Was last special survey an enhanced special survey No

3. Date next special survey due 13 March 2024

1.4.6 Condition Assessment Programme

1. Does the ship have a Condition Assessment Programme (CAP) rating? No

2. What is the latest rating? 0

1.4.7 Date of last annual survey 28 February 2020

1.4.8 Date of last boiler survey

1. Port boiler 28 February 2020

2. Starboard boiler

1.4.9 Is the ship subject to a Continuous Machinery Survey Yes

5. Dimensions

1.5.1 Length overall (LOA) 228.00 Meters

1.5.2 Length between perpendiculars (LBP) 219.00 Meters

1.5.3 Extreme breadth 32.19 Meters

1.5.4 Moulded breadth 32.26 Meters

1.5.5 Moulded depth 20.80 Meters

1.5.6 Keel to masthead 48.74 Meters

1.5.7 Distance bow to bridge 188.60 Meters

1.5.8 Distance bridge front - mid-point manifold 76.19 Meters
Vessel Particulars Questionnaire for GEORGIA M

1.5.9 Distance bow to mid-point manifold 112.41 Meters
1.5.10 Distance stern to mid-point manifold 116.59 Meters
1.5.11 Parallel mid-body diagram

1.7.5 Multiple deadweights
   1 Have multiple deadweights been assigned? No
   2 If yes, what is the maximum assigned? 74998.00

8 Recent Operational History

1.8.1 What is the max. height of mast above waterline (air draft) in normal SBT condition? 41.44 Meters
1.8.2 Has the ship traded continuously without requirement for unscheduled repairs since the last dry-dock, except for normal maintenance? Yes

1.8.3 Unscheduled repairs
   1. Have unscheduled repairs been carried out? No
   2. What was the nature of the repairs? Not Applicable

1.8.4 Has ship been involved in a pollution incident during the past 12 months? No

1.8.5 Has ship been involved in a grounding incident during the past 12 months? No

1.8.6 Has ship been involved in a collision during the past 12 months? No

1.8.7 If there is additional information relating to features of the ship or operational characteristics that may be of interest, please record details here.

2 Certificates

1 Certificates

2.1.1 Register number 32836-07-C

2.1.2 Does the ship comply with the International Convention for the Control and Management of Ships’ Ballast Water and Sediments? Yes

2.1.3 Type of tanker. If the ship is not an oil tanker specify the type as recorded in Part B Sect 1.11 of the IOPPC Oil Tanker

2.1.4 Certificate dates

Certificates
3  Crew

1  Crew Management

3.1.1  Number of Officers on board

1  What is the minimum number of officers to be carried as recorded in the Minimum Safe Manning Document? 6
2  What is the actual number of officers on board? 9

3.1.2  Crew employment by the Ship Operator

1  Is the Master employed by the Ship Operator? Yes
2  Are the officers employed by the Ship Operator? Yes
3  Are the ratings employed by the Ship Operator? Yes

3.1.3  What is the common language used on the Ship? English

3.1.4  Manning agent for Officers

1  Name Elvictor Crew Management Ltd
2  Full address 39 Aristotelous Valaoritou, Limassol, Cyprus
3  Office telephone number +302104224220
4  Office telex number N/A
5  Office fax number +302104173728/+302104224229
6  Office email address crew@elvictor.com

3.1.5  Manning agents

1  Are manning agent(s) wholly or partially owned by Operator? No
2 If No, does Operator have selection rights? Yes
3.1.6 Does the Operator maintain personnel files on officers assigned to its vessels? Yes
3.1.7 What is the retention rate for officers for the past 3 years? 100.00 Percent
3.1.8 Ratings on board
   1 What is the minimum number of ratings to be carried as specified in the Minimum Safe Manning Document? 8
   2 What is the actual number of ratings on board? 15
   3 List nationality of ratings GEORGIAN
3.1.9 Manning agent for Ratings (if different to Officers)
   1 Name
   2 Full address
   3 Office telephone number
   4 Office telex number
   5 Office fax number
   6 Office email address
3.1.10 Does the Operator maintain personnel files on ratings assigned to its ships? Yes
3.1.11 What is the retention rate for ratings for the past 3 years? 98.80 Percent

2 Continuity
3.2.1 Do senior officers return to the same ship on a rotational basis? Yes
3.2.2 Are senior officers rotated on ships of similar class within company fleet? Yes
3.2.3 Are junior officers and ratings rotated on ships of similar class within company fleet? Yes
3.2.4 If senior officers do not return to same ship on a rotational basis, are changes of Master, Chief Officer and Second Engineer organised to avoid a full change of officers at same time? Yes

3 Training
3.3.1 List Operator sponsored training courses available:
   1 To officers (Bridge Management etc.) BRM/BTM, ERM, Security Training, PMS "Telecomputer", Risk Assessment and Company’s CBT, SEAGULL TRAINING, Bruusgard CBT Training, Incident Investigation for Senior Officers, Media Response, ECDIS generic/specific.
   2 To ratings (Fire Fighting etc.) AFF, PSCRB, Safety, Security and Company’s CBT, SEAGULL TRAINING.
3.3.2 Are Masters and Chief Engineers required to attend company office before and after each tour of duty? Yes
3.3.3 Does operator hold regular training seminars ashore for officers? Yes
3.3.4 Are training seminars provided on board for officers and ratings? Yes
3.3.5 What courses, exceeding statutory requirements, are provided:
1 For senior officers
ERM, Risk Assessment, Ship Handling, Incident Investigation, Media Response, ECDIS specific, Safety Officer, Ship Security, and Company's CBT

2 For junior officers
BTM, ECDIS specific / ECDIS generic, Company's CBT.

3 For ratings
Company's CBT

</table>
4.1.2 Is a repeating magnetic compass fitted? No
4.1.3 Is there at least one radar operating in the 9 GHz frequency band (3cm/x band)? Yes
4.1.4 Are the 3 GHz (10cm/S band) and 9Ghz (3cm / X band) radars fitted with an electronic switching unit? Yes
4.1.5 Are the Radars fitted with ARPA? Yes
4.1.6 Is the ECDIS an approved system? No
4.1.7 Does ship carry sextant(s)? Yes
4.1.8 Does ship carry a signal lamp? Yes
4.1.9 Is each bridge wing fitted with:
   1 Rudder angle indicator Yes
   2 RPM indicator Yes
   3 Gyro repeater Yes
4.1.10 If the ship is fitted with a controllable pitch propeller, are indicators fitted on the bridge wings? No
4.1.11 Are steering controls and engine controls fitted on bridge wings? No
4.1.12 Is a Bridge Watch Navigation Alarm (BWNAS) system fitted? Yes

5 Safety
1 Safety Management
5.1.1 Quality management system:
   1 Is the ship operated under a Quality management system? Yes
   2 If Yes, what type of system? (ISO9002 or IMO Resolution A.741(18))? IMO Resolution A.741(18)
   3 If Yes, who is the certifying authority? BV
   4 Date of the ship’s certification 18 December 2018
2 Helicopters
5.2.1 ICS Guide to Helicopter/Ship Operations
   1 Does the ship comply with the ICS Guide to Helicopter/Ship Operations? No
   2 If yes, state whether winching or landing area provided
   3 If yes, what is the diameter of the circle provided
3 Firefighting and Lifesaving equipment
5.3.1 Fixed foam firefighting
   1 Is a fixed foam firefighting system installed for the cargo area? Yes
   2 If yes, what is the type of foam? Multipurpose
   3 What was the date of supply of the foam, or the date of the last Test Analysis Certificate? 17 February 2020
5.3.2 What type of fixed firefighting system is provided for:
   1 The paint locker? SEA WATER SPRINKLER
2 The pump room? AIR FOAM, SEA WATER, PORTABLE FIRE EXT.
3 The engine room? AIR FOAM, SEA WATER, PORTABLE FIRE EXT., LOCAL HYPER MIST SYSTEM
4 The void spaces? Not Applicable

5.3.3 Is a fixed dry powder firefighting system installed for the cargo area? No
5.3.4 Is a fixed water spray firefighting system installed for the cargo area? No
5.3.5 Is the ship equipped with a compressor for recharging breathing apparatus air cylinders? Yes

5.3.6 What type of lifeboat(s) is/are fitted? Conventional
5.3.7 Dedicated rescue boats
   1 Is a dedicated rescue boat provided? No
   2 If a dedicated rescue boat is carried, what is its construction? Rigid

6 Pollution Prevention

1 Pollution Prevention

6.1.1 Continuous deck edge fishplate
   1 Is ship fitted with a continuous deck edge fishplate enclosing the deck area? Yes
   2 If Yes, what is its minimum vertical height above the deck plating? 150.00
   3 What is maximum vertical height above deck plating at the position where the fish plate adjoins the aft thwartships coaming? 375.00
   4 How far forward of the athwartships coaming is this height maintained? 3.50
   5 Is an athwartship deck coaming fitted adjacent to accommodation and service areas? Yes
   6 What is the height of the coaming? 350.00

6.1.2 Is spill containment fitted
   1 Under the cargo manifold? Yes
   2 Under all bunker manifolds? Yes
   3 Under the bunker tank vents? Yes
   4 Around the deck machinery? Yes

6.1.3 What type of scupper plugs are provided? EXPANDED RUBBER TYPE

6.1.4 Preventing spill out entering the sea
   1 Are means provided to prevent spilled oil entering the sea? Yes
   2 If yes, what means are provided? Scupper plugs, dump valves, clean up equipment

6.1.5 Is the following pollution control equipment available to clean up oil spilled on deck:
   1 Sorbents Yes
   2 Non-sparking hand scoops/shovels Yes
   3 Containers Yes
   4 Emulsifiers Yes
   5 Non-sparking pumps Yes

6.1.6 Is the cargo piping system fully segregated from the sea chest? Yes
6.1.7 What type of sea valves are fitted? Butterfly
6.1.8 Pre-MARPOL tankers
   1 Is the ship a pre-MARPOL tanker? No
   2 If yes, is a cargo sea chest valve testing arrangement fitted which meets OCIMF recommendations? No
6.1.9 Are dump valves fitted to the slop tanks which will operate with normal inert gas pressure in the tank vapour space? Yes
6.1.10 Are overboard discharges fitted with blanks or alternatively, is there a testing arrangement for the overboard valves? Yes
6.1.11 Is there a discharge below the waterline for Annex II substances No
6.1.12 Is there a discharge above the waterline for Annex I oily mixtures Yes
6.1.13 Cargo piping pressure tests:
   1 On oil and chemical tankers, does the Operator have a policy to pressure test cargo piping at intervals no greater than 12 months? Yes
   2 If yes, specify pressure 13.50 Bar
6.1.14 Bunker piping pressure tests:
   1 Does Operator have policy to pressure test bunker piping at intervals no greater than 12 months? Yes
   2 If yes, specify pressure 7.00 Bar
6.1.15 Is garbage incinerator fitted? No

2 OPA 90 Requirements
6.2.1 Has the Operator submitted a Vessel Spill Response Plan to the US Coast Guard which has been approved by official USCG letter? Yes
6.2.2 Has a Geographic Specific Appendix been filed with the Captain of the Port for each Port Zone the ship expects to enter or transit? Yes
6.2.3 Has the Operator deposited a letter with the US Coast Guard confirming that the Operator has signed a service contract with an oil spill removal organisation for responding to a 'worst case scenario'? Yes

7 Structural Condition
1 Structural Condition

7.1.1 Cargo tank coating
   1 Are cargo tanks coated? Yes
   2 If yes, specify type of coating PURE EPOXY
   3 If all tanks are not coated, specify those tanks which are not coated all tanks coated
   4 If cargo tanks are coated, specify to what extent WHOLE TANKS
   5 What is the condition of coating? good

7.1.2 Ballast tank coating
   1 Are ballast tanks coated? Yes
   2 If yes, specify type of coating Pure Epoxy
   3 If yes, specify to what extent Whole Tank
4. What is the condition of the ballast tank coating? Good

7.1.3 Tank anodes
1. Are anodes fitted to the cargo tanks? No
2. Are anodes fitted to the ballast banks? Yes
3. What type of anodes are fitted ZINC
4. What is the extent of wastage of the anodes in the cargo tanks 0.00
5. What is the extent of wastage of the anodes in the ballast tanks 5.00
6. If anodes are aluminium, what is the height above tank bottom?

7.1.4 Is a formal programme in place for regular inspection of void spaces, cargo and ballast tanks? Yes

7.1.5 Planned Prevention Maintenance Programme
1. Does ship have planned prevention maintenance programme (PPM)? Yes
2. Is PPM manual (card system) or computerised? Computerised
3. What areas of the ship does the PPM cover? All Ship
4. If the PPM is Class-approved, what is the Class notation? NO

8 Cargo

8.2.2 Ballast handling Main Pump
1 Normal back pressure 7.00
2 Max RPM 1180.00

8.2.3 Bunker connections
1 What is the number of bunker connections per side? 2
2 What is the size of the bunker connection? 200.00

9 Cargo Specific

1 Cargo Handling (Oil)

9.1.1 Tank Plan

2 Double Hull Vessels

9.2.1 Centreline bulkhead
1 Is the ship constructed with a centreline bulkhead to all cargo tanks? Yes
2 If Yes, is bulkhead solid or perforated? Solid

9.2.2 'U' shaped ballast tanks
1 Is the ship fitted with any full breadth 'U' shape ballast tanks? No
2 If Yes, how many ballast tanks are full breadth? 0

3 Cargo Tank Capacities

9.3.1 Cargo Tank Capacities At 98% Full (M3) - Centre

9.3.6 Grand Total Capacity (98%) 84735.80

9.3.7 Ballast Capacities At 100% Full (M3) 25896.90

4 SBT Tanker

9.4.1 What is the total volume of the SBT tanks 25896.90 Cu Meters
9.4.2 What percentage of summer deadweight can the ship maintain with SBT only? 34.53 Percent

9.4.3 Does the ship meet the requirements of MARPOL Reg 13 (2)? Yes

9.4.4 Can segregated ballast be discharged through the cargo manifold? No

9.4.5 Is a spool piece to connect the ballast system to the cargo system provided? No

9.4.6 Dedicated/segregated ballast tanks
   1. Do cargo lines pass through any dedicated or segregated ballast tanks? No
   2. If Yes, what type of expansion is fitted? Not Applicable

9.4.7 Cargo tanks
   1. Do ballast lines pass through any cargo tanks? No
   2. If Yes, what type of expansion is fitted?

9.4.8 Line clearing
   1. Can the ship pump water ashore for line clearing? Yes
   2. If Yes, what is maximum attainable discharge rate? 2000.00 Cu Meters/Hour
   3. If Yes, what is maximum acceptable back pressure? 12.00 Bar

9.4.9 Which cargo tanks are designated for the carriage of heavy weather ballast? 3P COT & 3S COT

5 Cargo Handling

9.5.1 How many grades of cargo can be loaded or discharged with double valve segregation? 3

9.5.2 How many grades of cargo can be loaded or discharged using blank flanges? 3

9.5.3 If deepwell pumps and heat exchangers are fitted, can the pumps and heat exchangers be by-passed during loading? No

9.5.4 Oil Discharge Monitoring Equipment (ODME)
   1. Is there Oil Discharge Monitoring Equipment (ODME) fitted? Yes
   2. Is an Oil Discharge Monitoring System connected to the above waterline discharge? Yes
   3. If yes, is the Oil Discharge Monitoring System designed to automatically stop the discharge of effluent when its oil content exceeds permitted levels? Yes

9.5.5 Stability computer
   1. If the ship is >100m LOA, is it provided with a class-approved or class-certified stability computer? Yes
   2. Does this stability programme consider damaged stability conditions? No

6 Cargo Handling Systems

9.6.1 Is computer integrated with cargo system and equipped with alarm to monitor loading and discharging operations? No

9.6.2 Are dedicated cargo stripping lines and pumps provided? Yes

9.6.3 State location of cargo pump emergency stops

</table>

9.6.5 What is the principal type of cargo valve? Butterfly

9.6.6 What type of cargo valve actuator is fitted? Hydraulic

7 Cargo Room Control

9.7.1 Is ship fitted with a Cargo Control Room? (CCR) Yes

9.7.2 Can cargo and ballast pumps be controlled from the CCR? Yes

9.7.3 Can all valves be controlled from the CCR? No

9.7.4 Can tank innage/ullage be read from the CCR? Yes

9.7.5 Is ODME readout fitted in the CCR? Yes

9.7.6 Can the inert gas system be controlled from the CCR? Yes

8 Gauging and Sampling

9.8.1 Can cargo be transferred under closed loading conditions in accordance with ISGOTT 11.1.6.6? Yes

9.8.2 What type of fixed closed tank level gauging system is fitted? Floating

9.8.3 Is the tank level gauging system provided with local readouts at each tank? No

9.8.4 Is the tank gauging system calibrated by a Internationally-recognised cargo inspection company? Yes

9.8.5 If it is a portable system does the sounding pipe extend to full tank depth? No

9.8.6 Are bunker tanks fitted with a full depth gauging system? Yes

9.8.7 High level alarms

1. Are high level alarms fitted to the cargo tanks? Yes

2. If Yes, are the high level alarms fitted to all cargo tanks? All

3. Are the high level alarms independent of the gauging system? Yes

9.8.8 Bunker tanks high level alarms

1. Are bunker tanks fitted with high level alarms? Yes

2. If Yes, are bunker tank high level alarms part of the primary tank gauging system? No

9.8.9 Is closed-sampling equipment provided? Yes

9.8.10 Are cargo tanks fitted with dipping points as per IMO Res 497 4.4.4? Yes
9.8.11 Vapour lock calibration
1. If portable equipment for gauging uses vapour locks, are vapour locks calibrated by a recognised cargo inspection company? Yes
2. If Yes, what is the name of the cargo inspection company? Nippon Kaiji Kentei Kyokai
3. If Yes, by whom are vapour locks certified? Nippon Kaiji Kentei Kyokai

9.8.12 Portable gauging equipment
1. Is portable equipment used for gauging? Yes
2. If yes, who is the manufacturer? Enraf Tank System S.A. (Hermatic)
3. How many units are supplied? 2

9.8.13 What is the name of the manufacturer of the vapour locks? HERMetic Compact Valve C2-SS-SEC 2’ Female

9.8.14 What is the nominal (internal) diameter of the vapour lock? 52.00 Millimetres

9.8.15 Vapour locks
1. To what standard is the thread of the vapour lock manufactured? HERMetic Compact Valve C2-SS-SEC 2’ Female
2. Can vapour lock be used for ullaging? Yes
3. Can vapour lock be used for temperature? Yes
4. Can vapour lock be used for interface? Yes
5. Can vapour lock be used for cargo sampling? Yes
6. If the vapour lock can be used for cargo sampling, what is the volume of the sample that can be drawn? 500 ml

9.8.16 Specify portable equipment for checking oil/water interface Hermatic U.T.I.

9.8.17 Can cargo samples be taken at the manifold? Yes

9.8.18 What is the means of taking cargo temperatures? Remote Readout/U.T.I.

9 Vapour Emission Control

9.9.1 Is a vapour return system fitted? Yes

9.9.2 If fitted, is vapour line return manifold in compliance with OCIMF Guidelines? Yes

9.9.3 Does the ship possess Vapour Emission Control (VEC) Certification? Yes

9.9.4 If yes, state the issuing authority? NKK

10 Venting

10.1 What type of venting system is fitted Individual P/V Valves / Common P.V. Breaker / Mast Riser

10.2 What is the maximum venting capacity? 2750.00 Cu Meters/Hour

10.3 What is the P/V valve opening pressure? 1400.00 MM/WG

10.4 What is the P/V valve vacuum setting? 700.00 MM/WG

10.5 Are isolating valves fitted to each cargo tank? Yes

10.6 Does the secondary venting arrangement provide for each tank, a full a flow P/V valve (or valves) on the tank side of the isolation valve or pressure sensing equipment with the readouts in the CCR? Yes

10.7 Are pressure sensors, having readouts in the cargo control position, provided in each cargo tank? Yes
9.10.8 Mast risers
1. Is venting through a mast riser? Yes
2. Are mast risers fitted with high velocity vents? No
3. If Yes, state opening pressure
4. What is the vacuum setting of the mast riser P/V valve?
5. What is the maximum capacity of the mast riser venting system? 10774.00 Cu Meters/Hour

9.10.9 What is the maximum loading rate for homogenous cargo? 8619.00 Cu Meters/Hour

11 Cargo Manifolds

9.11.1 Does the cargo manifold arrangement comply with the latest edition of the OCIMF 'Recommendations for Oil Tanker Manifolds and Associated Equipment'? Yes

9.11.2 Manifold Valves
1. What type of valves are fitted at manifold? Butterfly
2. If hydraulic valves fitted, what are closing times?

9.11.3 What is the number of cargo connections per side? 3

9.11.4 What is the size of cargo connections? 400.00 Millimetres

9.11.5 Are pressure gauges fitted with valves or cocks located outboard of manifold valves? Yes

9.11.6 What is the material of the manifold? STEEL/ Ansi

9.11.7 Is a cargo line crossover fitted at the manifold? Yes

12 Manifold Arrangement

9.12.1 Measurements
1. Distance A bunker manifold to cargo manifold 2000.00 Millimetres
2. Distance B cargo manifold to cargo manifold 2500.00 Millimetres
3. Distance C cargo manifold to vapour return manifold 2000.00 Millimetres
4. Distance D manifolds to ship's rail 4380.00 Millimetres
5. Distance E spill tank grating to centre of manifold 900.00 Millimetres
6. Distance F main deck to centre of manifold 2090.00 Millimetres
7. Distance G maindeck to top of rail 1140.00 Millimetres
8. Distance H top of rail to centre of manifold 950.00 Millimetres
9. Distance J manifold to ship side 4600.00 Millimetres
10. What is the height of the manifold connections above the waterline at loaded (Summer Deadweight) condition? 9.21 Meters
11. What is the height of the manifold connections above the waterline in normal ballast? 16.63 Meters
12. What is the height of manifold connections above the waterline in lightship condition? 20.28 Meters
13. What is the distance between the keel and centre of manifold? 22.91 Meters

9.12.2 Is a stern discharge manifold fitted? No

9.12.3 If stern manifold fitted, state size 0.00 Millimetres

9.12.4 Is a bow manifold fitted? No
9.12.5 If bow manifold fitted, state size
9.12.6 If bow manifold is fitted, to what Standard is it manufactured?

13 **Gas Monitoring**

9.13.1 Is a fixed system fitted to continuously monitor potentially flammable atmospheres? Yes
9.13.2 What spaces are monitored? PUMPROOM 'A' DECK ENTRANCE, PORT/STBD , GALLEY, AIR COND. ROOM
9.13.3 Where are sensors/sampling points located in pumproom? BOTTOM, DUCT
9.13.4 What is the rank of the person or persons who are responsible for testing sensors/sampling points? CHIEF OFFICER
9.13.5 Who is responsible for testing sensors/sampling points? CHIEF OFFICER

14 **Cargo Heating**

9.14.1 Heating coils
   1 Are the cargo tanks fitted with heating coils? Yes
   2 If Yes, how many independent heating coil sets are fitted to each cargo tank? 3
   3 If Yes, are all the cargo tanks fitted with heating coils? Yes
   4 What is the height of the heating coils above the tank bottom? 150.00 Millimetres
   5 What is the total heating surface of the heating coils, per tank? 53.33 Sq Meters
   6 What is the ratio of the heating surface to the volume of the tank? 0.0076
   7 Are heating coils welded or coupled? Welded

9.14.2 Are heat exchangers external to cargo tanks? No
9.14.3 Are there external ducts? No
9.14.4 What type of material is used for the heating coils? SS

9.14.5 Inlet heating
   1 Inlet heating medium to coils Steam
   2 With Sea temperature 5.00 Deg C
   3 With air temperature 2.00 Deg C

9.14.6 Heating agent Steam

9.14.7 Number of heaters
   1 Number of heaters 1
   2 Able to raise temperature from 44.00 Deg C
   3 Able to raise temperature to 66.00 Deg C
   4 Time taken to raise temperature 96.00 Hours

9.14.8 Total capacity of boilers 23340000.00 KCal

15 **Inert Gas and Crude Oil Washing**

9.15.1 Is an inert gas system (IGS) fitted? (If No, ignore remainder of this section) Yes
9.15.2 Is a P/V breaker fitted? Yes
9.15.3 Do the inert gas distribution lines have natural segregations that match the cargo pipeline segregations? No

9.15.4 Is the inert gas supplied by flue gas, inert gas generator and/or stored nitrogen? Flue Gas

9.15.5 Are fixed O2 alarms fitted in inert gas generating spaces? Yes

9.15.6 What is the capacity of the IGS? 7500.00 Cu Meters/Hour

9.15.7 How many fans does it have? 2

9.15.8 What is the total combined fan capacity? 7500.00 Cu Meters/Hour

9.15.9 IG generator
   1. Is a top-up IG generator fitted? No
   2. If Yes, what is its capacity?

9.15.10 Is an IGS operating manual on board? Yes

9.15.11 What type of deck seal is fitted? Wet

9.15.12 How many segregations does the IGS have? 0

9.15.13 What method is used to isolate individual tanks? TANK I.G. VALVE

9.15.14 What type of non-return valve is fitted? Flap swing check type

9.15.15 If the cargo tanks can be individually isolated from the IGS/Vent line, what means of secondary protection is fitted? Remote pressure / vacuum monitoring

9.15.16 If ship has double hull or sides, are facilities available to inert ballast tanks and other void spaces? Yes

9.15.17 How is inert gas supplied to the ballast tanks or other void spaces? Spool piece connection

9.15.18 Can these tanks/spaces be purged with air? Yes

9.15.19 Emergency IGS Connection
   1. Where is the location of the emergency IGS connection? Cargo Manifold port and Stbd
   2. What is the size of the emergency IGS connection? 400.00 Millimetres

9.15.20 Crude Oil Washing
   1. Is a Crude Oil Washing (COW) installation fitted? Yes
   2. Are COW drive units fixed or portable? Fixed
   3. Are COW drive units programmable? Yes
   4. Can COW be conducted at the same time as cargo discharge? Yes
   5. Is there an approved COW Manual on board? Yes
   6. What is the working pressure of the COW lines? 12.00 Bar

16 Cargo Pumps

9.16.1 Cargo Pumps

9.16.2 Stripping Pumps

9.16.3 Ballast Pumps

10 Mooring
1 Mooring

10.1.1 Does the ship meet the recommendations contained in the latest edition of OCIMF Mooring Equipment Guidelines? Yes

10.1.2 Mooring Winches

1 Is brake testing equipment on board? Yes

2 When were the brakes last tested? 23 December 2019

10.1.3 Mooring Wires (on drums)

10.4.4 How many sets of bitts are fitted in the bow area? 2
10.4.5 What is the height of the bitts in the bow area? 950.00 Millimetres
10.4.6 What is the Safe Working Load (SWL) of the bitts in the bow area? 92.00 Tonnes
10.4.7 What is the distance between bow fairleads and nearest bitts? 4400.00 Millimetres
10.4.8 Is the bow area clear of any obstructions which would hamper towing connections? Yes

5 Escort Tug

10.5.1 SWL of closed chock on stern 64.00 Tonnes
10.5.2 SWL of bollard on poopdeck suitable for escort tug 92.00 Tonnes
10.5.3 Are stern chock and bollard capable of towing astern to 90 degrees? Yes

6 Single Point Mooring (SPM) Equipment

10.6.1 Does the ship meet the recommendations contained in the latest edition of OCIMF 'Recommendations for Equipment Employed in the Bow Mooring of Conventional Tankers at Single Point Moorings'? Yes
10.6.2 Bow chain stoppers
   1 Are bow chain stoppers fitted? Yes
   2 If Yes, how many? 1
Vessel Particulars Questionnaire for GEORGIA M

3 If Yes, state type
   Tounge type

4 If Yes, what is the Safe Working Load (SWL)?
   200.00 Tonnes

5 What is the maximum size chain diameter the bow stopper(s) can handle?
   76.00 Millimetres

10.6.3 Closed fairleads
   1 Are closed fairleads of OCIMF recommended size (600mm x 450mm)?
      Yes
   2 If not, give details of size (in format ABCmm x XYZmm)

10.6.4 If two forward bow fairleads are fitted give distance between them

10.6.5 What is the distance between the bow fairlead and stopper/bracket?
   2808.00 Meters

10.6.6 What is the distance from the stopper bracket to roller lead/winch drum?
   4500.00 Meters

10.6.7 Is there a direct lead from the bow stopper to the winch drum (not the warping end)?
   No

10.6.8 Is the winch storage drum capable of safely accommodating 150m X 80mm fibre pick up rope?
   Yes

10.6.9 Is the winch storage drum capable of safely accommodating 200m X 80mm fibre pick up rope?
   Yes

7 Bow mooring arrangement diagram

</tbody>
</table>
11.1.14 List any other communications equipment carried

EMAIL, FLEET BB VOICE, VSAT

11.1.15 Can the radio transmit the helicopter homing signal on 410 KHz?

Yes

12 Propulsion

1 Main Propulsion

12.1.1 Means of main propulsion

1 What is the means of main propulsion

Motor

2 If motor state whether two stroke or four stroke

2 Stroke

3 If four stroke, state how many engines fitted

0

12.1.2 How many propellers are fitted?

Single

12.1.3 Is a controllable pitch propeller fitted?

Fixed

12.1.4 Boilers

1 How many boilers are fitted?

1

2 What is rated output of boilers?

18.00 Tonnes/Hour

3 Are the boilers equipped to operate on low sulphur fuel when the vessel is operating in Emission Control Areas

Yes

12.1.5 Low sulphur fuel requirements

1 Is equipment fitted and are procedures in place to changeover main propulsion fuels to meet low sulphur fuel requirements?

Yes

2 Is equipment fitted and are procedures in place to changeover auxiliary equipment fuels to meet low sulphur fuel requirements?

Yes

12.1.6 What type of fuel is used for main propulsion?

HFO 380 CST at 50 deg C

12.1.7 Are pressurised fuel pipes double sheathed?

Yes

12.1.8 When moored at SBM, is main engine capable of being run astern at low revolutions for extended periods (up to 24 hours continuously)?

Yes

12.1.9 Can a speed of less than 5kts be maintained?

Yes

12.1.10 Is the ship certified for Unmanned Machinery Space (UMS) operation?

Yes

12.1.11 Is the machinery space operated in unmanned mode?

Yes

2 Thrusters

12.2.1 Bow thruster

1 Is a bow thruster fitted?

No

2 If Yes, give Brake Horse Power

0.00 BHP

12.2.2 Stern thruster

1 Is a stern thruster fitted?

No

2 If Yes, give Brake Horse Power

0.00 BHP

12.2.3 High angle rudder

1 Is a high angle rudder fitted?

No

2 Number fitted

0

3 What type
3  Generators

12.3.1 How many power generators are fitted? 3
12.3.2 What is the design power output of the generators? 660KW
12.3.3 What type of fuel is used in the generating plant? HFO 380 CST at 50 deg C
12.3.4 Is an Emergency Generator or batteries fitted? Yes

4  Main engine air start compressors

12.4.1 Number of main engine start compressors 2
12.4.2 Operating pressure 29.40 Bar
12.4.3 Motive power of emergency compressor 150.00 Cu Meters/Hour

5  Bunkers

6  Steering gear

12.6.1 What type of steering gear is fitted? ELECTRO HYDRAULIC 4 RAM TYPE
12.6.2 How many motorized hydraulic pumps or motors fitted? 2
12.6.3 How many telemotors fitted? 2
12.6.4 Is an emergency rudder arrest/rudder control fitted? Yes

7  Anti-pollution

12.7.1 Is an engine-room bilge high level alarm fitted? Yes
12.7.2 Is a pump room bilge high level alarm fitted? Yes
12.7.3 Is there a permanently installed system for the disposal of residues from the machinery space sludge tank to shore? Yes
12.7.4 Are there facilities on board to incinerate machinery space sludge? Yes
13  Ship to Ship Transfer

   Yes

13.1.2 Are at least 7 ratings available to assist with mooring operations?  
   Yes

13.1.3 What is Safe Working Load (SWL) of bitts in the manifold area?  
   25.00 Tonnes

13.1.4 Are manifold bitts at least 35 metres away from the breastlines leading fore and aft?  
   Yes

13.1.5 What is the maximum outreach of the derricks within their designed SWL?  
   7.27 Meters

13.1.6 Does the Operator's SMS provide instructions regarding the transfer of personnel using derricks or cranes?  
   Yes

13.1.7 If cranes are fitted, are they certified for personnel transfer?  
   Yes

13.1.8 Are personnel who will operate cranes for personnel transfer properly trained?  
   Yes

13.1.9 Are four (4) 200m x 40mm messenger lines available for Ship-To-Ship (STS) mooring operations?  
   Yes

13.1.10 Are there two (2) closed chocks with associated bollards and leads to winches located within 35 metres forward and aft of the centre of the cargo manifold?  
   Yes

14  Combination Carriers

14.1.1 State design of hatches

14.1.2 State type of hatches

14.1.3 State if hatches fitted with single or double seals in hatch coaming

14.1.4 Last date cargo holds/tanks were tested to normal working pressure (min.500mm wg) to prove gas tightness of hatches

14.1.5 Were the hatches proven to be gas tight?  
   No
